British Columbia Home Protection Office

Dear Sirs;

Re: Mr. Oldham/ J Oldham Holdings Inc. Proficiency Recommendation Letter

I have had the pleasure of knowing and working with Mr. Oldham for approximately 6 years. Mr. Oldham and his company were engaged initially to manage and oversee the redevelopment and rebuild of our home located in Silverton BC.

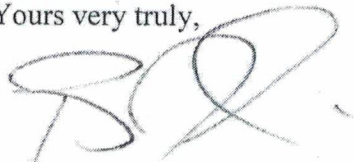

The home, originally built in the early 1900's, was completely rebuilt including interior and exterior finishes, electrical, plumbing, septic, heating and landscaping, while maintaining the style and character of the original construction. In addition a number of improvements were made including all season decking and an expanded outdoor living space.

Subsequent to the original project Mr. Oldham was retained to design, permit and construct a standalone Carriage House on the Silverton property and then to completely rebuild and expand a summer home located in Invermere BC.

I can confirm, without qualification, the work was professionally managed to a very high standard and completed on a timely basis according to budget. The quality of work and construction was excellent and the overall management of the projects including design, permit application, budgeting, quotes, management of sub trades, construction and building inspections were all professionally and competently managed.

Should you require further information please do not hesitate to contact the undersigned directly at (403) 213-2903.

Yours very truly,

Bruce L. Pachkowski, CA, CBV, ICD.D
